

SmartScope ZIP® 300

SmartScope ZIP 300 is a high performance floor model system designed for high accuracy and repeatability on larger, heavier parts. ZIP 300 also offers:

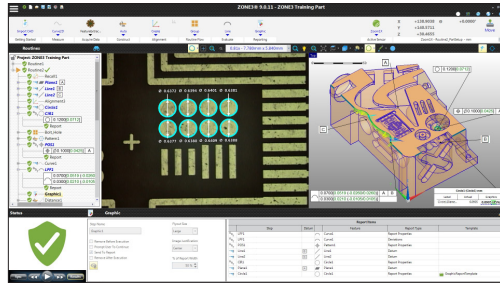

- **Built-in Measurement Stability –**
The heavy-duty steel frame, granite surface plate and cast-iron worktable provide a very thermally and mechanically stable platform.
- **Accurate Video Metrology –**
AccuCentric® motorized zoom lens automatically compensates magnification for each zoom position. ZIP 300 offers optical configurations to suit a wide range of applications.
- **Multisensor Versatility –**
Optional touch probes, lasers and micro-probes.

SmartScope ZIP® 300

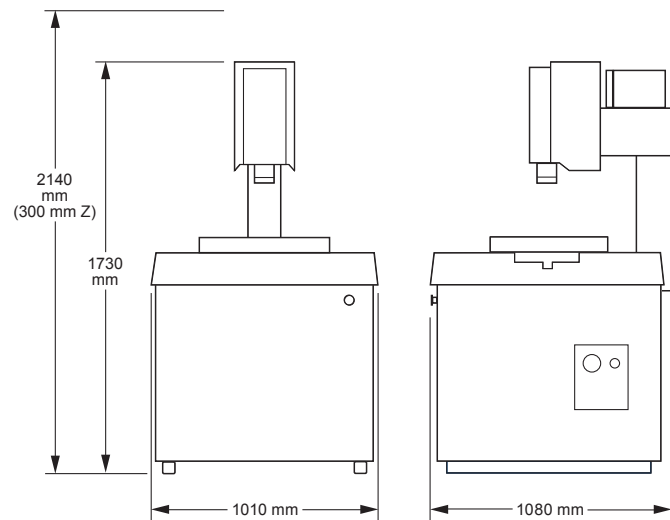

ZONE3® Metrology Software represents a totally new way of working with multisensor measurement systems, providing faster, easier, and more productive measurements.

MeasureMind® 3D makes it easy to measure anything from simple geometric forms to complex free-form shapes using data from any sensor or combination of sensors.

Full feature Measure-X® software offers 2D CAD program generation and general-purpose dimensional measurement with multi-sensor and rotary axis support.

Accuracy is evaluated with a QVI verification procedure where "L" is measured length in millimeters. Specifications apply within the rated environment. Standard optical specifications apply at the maximum optical magnification of the standard configuration. XY Accuracy applies with an evenly distributed load up to 5 kg in the standard measuring plane. Depending on load distribution, accuracy at maximum payload may be less than standard. The standard measuring plane is defined as a plane that is within 25 mm of the worktable surface.

*Lenses and lens attachments can be manually interchanged to change magnification and working distance. Adapter tubes can be manually changed to change magnification without impacting work distance, but unlike lens changes, adapter tube changes require optical system realignment and recompensation. **SP25 only supported in ZONE3. Feather Probe, Rainbow Probe, and TeleStar Probe only supported in ZONE3 and MeasureMind 3D.
